PALS Case Scenario Testing Checklist Shock Case Scenario Cardiogenic Shock

Student Name _____

Date of Test _____

Critical Performance Steps		k if done rectly
Team Leader		
Assigns team member roles		
Uses effective communication throughout		
Patient Management		
Directs assessment of airway, breathing, circulation, disability, and exposure, including vital signs		
Directs administration of 100% oxygen		
Directs application of cardiac monitor and pulse oximetry		
Identifies signs and symptoms of cardiogenic shock		
Categorizes as compensated or hypotensive shock		
Directs establishment of IV or IO access		
Directs slow administration of a 5 to 10 mL/kg fluid bolus of isotonic crystalloid over 10 to 20 minutes and reassesses patient during and after fluid bolus. Stops fluid bolus if signs of heart failure worsen		
Directs reassessment of patient in response to treatment		
Recognizes the need to obtain expert consultation from pediatric cardiologist		
Identifies need for inotropic/vasoactive drugs during treatment of cardiogenic shock		
If the student does not indicate the above, prompt the student with the following question: "What are the indications for inotropic/vasoactive drugs during cardiogenic shock?"		
Case Conclusion/Debriefing		
States therapeutic end points during shock management		
If the student does not verbalize the above, prompt the student with the following question: "What are the therapeutic end points during shock management?"		
STOP TEST		
Instructor Notes		
 Place a check in the box next to each step the student completes successfully. If the student does not complete all steps successfully (as indicated by at least 1 blank check box), the student must receive remediation. Make a note here of which skills require remediation (refer to instructor manual for information about remediation). 		
Test Results Check PASS or NR to indicate pass or needs remediation:] PASS	□ NR
